Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Gennesseaux.

Re claims 6-10, Gennesseaux discloses a method for controlling the drive of an actuator of an active vibration isolation support system that includes an elastic body (9) receiving a load from a vibrating body, a liquid chamber (A) having a wall of which at least a part is formed from the elastic body, a movable member (11) that moves out and back to change the capacity of the liquid chamber, a single excursion out and back by the movable member defining a movement cycle, and an actuator (14, 15) that receives a supply of current to generate an electromagnetic force for moving the movable member out, and a sensor (33) for sensing the position of the movable member, the method comprising the step of: controlling the current supplied to the actuator such that

Art Unit: 3683

the amount of current supplied is dependent upon the position of the movable member as sensed by the sensor. (Column 5, lines 22-28)

Allowable Subject Matter

3. Claims 1-5 and 11 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach controlling the current supplied to the actuator such that the current passing through the actuator during operation becomes zero at least when the movable member has moved back.

Response to Arguments

5. The Declaration filed February 16, 2005 has been received and considered. The rejections relying on Nemoto et al. have been withdrawn. However, a new grounds of rejection is presented above.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (571)272-7127. The examiner can normally be reached on Monday-Friday, 6:30 AM - 4:00 PM.
